Richard Grunert

Full-Stack Web Developer // Android Developer // Linux Administrator

Experience

- Three years Java / Android development
- Two years full-stack web application development
- Three years Linux administrator
- Three years in Object-Oriented Programming, two years in functional programming
- Worked in eight different programming languages
- Have done both front- and back-end design
- Self-driven and extremely fast learner

About Me

I've built $20,000 websites for attorneys, developed my own mobile software and am a huge Linux aficionado (though I also work daily with Windows and OSX systems). I run my own servers for fun, build websites from scratch and co-administrate a website that gets around 30,000 hits daily from all over the US. I seek new opportunities that will help me grow as a professional in the world of computers and programming.

You can see examples of my projects at my personal website: http://furu.guru.

Technologies

I know too many to list here.
The followng list is only a sample.

- Git
- Maven / Gradle
- Nginx / Apache
- Postgres / MySQL
- HTTPS (SSL)
- jQuery
